

ELIMINATE EARLY DEPARTURES

TRAFFIC CONTROL BARRIER GATE SYSTEM

HIGH
VISIBILITY

HEAVY-DUTY
DRIVE
SYSTEM

STRONG
LONG
LASTING

PROTECT YOUR INVESTMENT BY PREVENTING EARLY DRIVE-OFFS

By installing SafeRack's engineered traffic safety gates you reduce the risk of drive-offs that could lead to costly down-times and replacement of equipment. Traffic gates are interlocked back to gangway, so the gate stays down until the gangway is raised to its stored position.

CONSIDER THIS

- ▶ What happens when your driver gets busy and forgets to raise your gangway and safety cage before driving away?
- ▶ Has this ever happened in your facility?
- ▶ Who pays when this happens?
- ▶ How much lost revenue does a downed loading rack cost your company per day?

Features

Long-lasting Design

Rustproof Aluminum Alloy Chassis

High Visibility

12'-0" Long Red/White Padded Gate Arm standard. Red/Green LED indicators lights are also available.

Speed

2.5 Seconds to Open or Close

Safe Controls

Safe, Low-Voltage Control Inputs

ULTRA-RELIABLE WITH SUPERIOR PERFORMANCE

TRAFFIC GATE SYSTEM

High-traffic, high-speed DC powered barrier gate operators with Battery Backup keep traffic flowing and provide easy in and out access 24 hours a day. Rated for 10,000 cycles per day with an opening time of only 0.9 seconds and constructed of corrosion resistant aluminum alloy. Our traffic gate systems are the ideal choice for high-traffic Parking applications. The product's Security+ 2.0® radio technology provides unparalleled reliability and quick, secure access.

ADDITIONAL FEATURES

Closing Timer

Adjustable closing timer from 1 to 33 Seconds

Battery Backup

Safeguard your property by providing up to 900 cycles* when the power is down.

Breakaway Arm

Can be easily reinstalled if arm is hit, quickly restoring traffic control.

Sequenced Access Management

Provides control between barrier and slide/swing gate operators to maximize traffic flow.

Magnetic Limit Sensors

Have no moving parts and are designed for high-cycle applications, so there's less wear and tear and you're assured dependable operation day-in and day-out.

Limit Switch

Optional - 372GL limit switch required to interlock gangway to traffic gate system. Priced separately.
